Re:

Inquiry Concerning High-Speed Access to the Internet Over Cable
and Other Facilities, GN Docket No. 00-185; Appropriate Regulatory
Treatment for Broadband Access to the Internet Over Cable
Facilities, CS Docket No. 02-52; Appropriate Framework for
Broadband Access to the Internet over Wireline Facilities, CC Docket
No. 02-33; Computer III Further Remand Proceedings, CC Docket
Nos. 95-20 & 98-10
Notice of Ex Parte Presentation

Dear Ms. Salas:

Submitted herewith pursuant to Section 1.1206(b)(2) of the Commission's rules are an original and one copy of a notice regarding permitted oral ex parte presentations in the above-captioned proceedings. On October 30, 2002, Marc Berjka of Microsoft Corp., Mitch Rose of The Walt Disney Company, Scott Blake Harris of Harris Willshire & Gramis, and the undersigned met with Susan Eid and Chris Librelli, Legal Advisors to Chairman Powell, regarding the need for consumers to be able to connect to and use the Internet without interference from network operators.

The parties emphasized that broadband deployment will accomplish little if consumers are deprived of the ability they now enjoy lawfully to roam over the Internet, to run the applications they want using the equipment they choose, to gather, create, and share information, and to connect to websites absent interference by network operators. The history of the Internet has been characterized by consumer ability to use an unprecedented array of content, services, and applications via an ever-increasing repertoire of products. The parties expressed concern that this principle may not be carried forward to the broadband era. The parties also discussed other submissions in these proceedings that have addressed how the long-term principle of

network neutrality could be undermined if the Commission does not act to protect the ability of consumers to reach the Internet content of their choice.

We also distributed the testimony of Craig Mundie, Microsoft's Senior Vice President and Chief Technical Officer of Advanced Strategies and Policy from the Senate Commerce Committee's hearing "The Government's Role in Promoting the Future of the Telecommunications Industry and Broadband Deployment," which addresses these issues in more detail and already has been submitted in these dockets.

Kindly address any questions to the undersigned

Sincerely,

A handwritten signature in black ink that reads "Gerard J. Waldron" followed by a stylized flourish.

Gerard J. Waldron
Counsel to Microsoft
